

Bergsteiger Amsterdam: basket mounting / mounting the front light

You have the option of equipping the bike with light & basket, only with light (without basket) or only with basket (without light).

- ✓ **1) Light only:** If you only want to mount the light, please choose the bracket (1) from the picture on the right. Screw the lamp to the bracket. Then you can mount the bracket with the screw on the fork, which holds the fender at the front.
- ✓ **2) Light & basket:** If you want a basket & light combination, please select the bracket (2) from the image on the right. If the ends of the bracket are bent too far apart, please bend them together with pliers.
- ✓ **3) Basket only:** With the mounting plate (3) in the picture on the right, it is possible to mount the basket without any light at all.

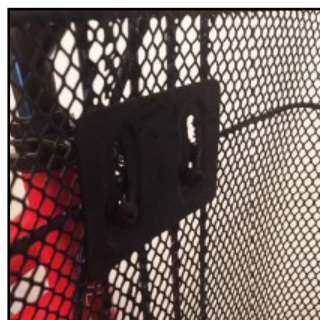

The bracket (2 or 3) is attached to the underside of the basket with the enclosed screws (4). Nuts are not required as the bracket has (2 or 3) threads. The mounting rods are clamped and centered between the bracket (2 or 3) and the basket.

The assembly linkage is slipped onto the axle. Then the axle nuts can be tightened.

The basket is screwed to the mounting device of the handlebar with the enclosed screws (4) and nuts. If the stitches in the basket are not at the correct height, you can remove 1-2 stitches at the correct height with pliers.

👍 We wish you a good ride and a lot of fun with your city bike!
